# ★ PRACTICAL=2 ★

**Aim**:= Write a program to that perform as calculator (addition, multiplication,division, subtraction).

**Filename :=** calculator.c

```c
#include<stdio.h>
#include<conio.h>
   void main()
{
int a,b,add,mul,sub;
float div;
printf("Enter the two values.");
scanf("%d%d",&a,&b);
add=a+b;
mul=a*b;
sub=a-b;
div=a/b;
printf("Addition is = %d\n",add);
printf("Multiplication is = %d\n",mul);
printf("Subtraction is = %d\n",sub);
printf("Division is = %.2f\n",div);
getch();
}
```

Output:
